August 2011

Project Spotlight: Moorefield Village

Address: Ashburn, VA

Areas Completed: 12,813 sqft.

Services: Revive Color Refresher

Project Challenges: Scheduling due to Spring weather

Tip Corner

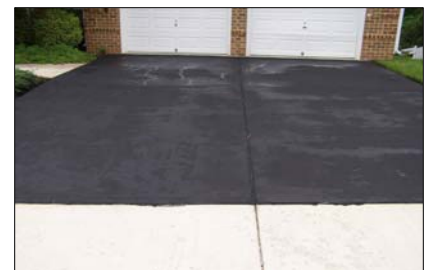

- How to refresh exterior concrete-

Concrete is an exceedingly durable material for driveways and patios, but it is not generally thought of as the most attractive choice. Many homeowners who tire of the typical grey shade will be delighted to learn that there are options for adding color to a concrete surface. While some opt for a concrete paint to brighten up their outdoor space or basement floor, others find that stain is a better solution. SCOFIELD® Revive™ Color Refresher, you can easily improve integrally colored concrete surface, regardless of who manufactured the original color.

Since SCOFIELD Revive Color Refresher penetrates and reacts with the concrete and therefore, no buildup is formed. The final result gives the approximate appearance of newly placed concrete.
